Table 12

**Q.6 Here are two arguments that have been made about the amount the UK government borrows and how quickly this should be reduced through spending cuts and tax rises. Please say which of them is closer to your own view?**

**Statement 1:**

**Statement 1: The government's spending cuts are hurting the economy. It should cut taxes, and/or cut spending less fast, even if that means we go on borrowing more for longer, because given how much we already owe, borrowing an extra few billion pounds cannot do much more harm or Statement 2: Borrowing more at a time when we already owe so much money will simply make matters worse, as the country will have to pay even more back in the longer term. We have to bring the debt and the deficit under control even if it has some painful effects for the economy in the short term**
