US Government Doing Too Much or Too Little — The humanitarian situation, eg. providing aid and accepting refugees

Thinking about the US government's overall response to the war in Ukraine, do you think they are doing too much, about the right amount, or too little, when it comes to:

	Total	Age					Gender		Education		Race

Lord Ashcroft Polls - Ukraine Poll

Online sample of 2,024 US adults fielded from February 10 to February 14, 2023.

Margin of error: +/-2.4%.

This survey is based on 2,024 interviews of US adults, conducted on the internet. The sample was weighted according to gender, age, race/ethnicity, education, and US Census region based on voter registration lists, the U.S. Census American Community Survey, and the U.S. Census Current Population Survey, as well as 2020 Presidential vote. Respondents were selected to be nationally representative of the population of the United States. The weights range from 0.24 to 3.86 with a mean of 1 and a standard deviation of 0.42.

The margin of error (a 95% confidence interval) for a sample percentage p based upon the subsetting sample is approximately 2.4%. It is calculated using the formula:

$$\hat{p} \pm 100 \times \sqrt{\frac{1 + CV^2}{n}}$$

where CV is the coefficient of variation of the sample weights and n is the sample size used to compute the proportion. This is a measure of sampling error (the average of all estimates obtained using the same sample selection and weighting procedures repeatedly). The sample estimate should differ from its expected value by less than margin of error in 95 percent of all samples. It does not reflect non-sampling errors, including potential selection bias in panel participation or in response to a particular survey.
